
Django DAL Documentation

Release 1.0.0

MPA Solutions

Mar 30, 2021

Contents

1	Contents	1
1.1	Django DAL	1
1.2	Configurations	2
1.3	Contributing	2
1.4	Credits	4
1.5	Change Log	5
2	Indices and tables	7

1.1 Django DAL

1.1.1 Documentation

The full documentation is at <https://django-dal.readthedocs.io>.

1.1.2 Quickstart

Install Django DAL:

```
$ pip install django-dal
```

Add `django-dal` to your `INSTALLED_APPS`

```
INSTALLED_APPS = [  
    # ...  
    'django_dal',  
    # ...  
]
```

1.1.3 Running Tests

Does the code actually work?

```
$ source <YOURVIRTUALENV>/bin/activate
$ (myenv) $ pip install tox
$ (myenv) $ tox
```

1.1.4 Contributors

Here is a list of Django-DAL's contributors.

1.2 Configurations

1.2.1 Install

django-dal is available on <https://pypi.python.org/pypi/django-dal/> install it simply with:

```
$ pip install django-dal
```

1.2.2 Configure

Settings

Add `django_dal` to your `INSTALLED_APPS`

```
INSTALLED_APPS = [
    # ...
    'django_dal',
    # ...
]
```

1.3 Contributing

Contributions are welcome, and they are greatly appreciated! Every little bit helps, and credit will always be given.

You can contribute in many ways:

1.3.1 Types of Contributions

Report Bugs

Report bugs at <https://github.com/MPASolutions/django-dal/issues>.

If you are reporting a bug, please include:

- Your operating system name and version.
- Any details about your local setup that might be helpful in troubleshooting.

- Detailed steps to reproduce the bug.

Fix Bugs

Look through the GitHub issues for bugs. Anything tagged with “bug” is open to whoever wants to implement it.

Implement Features

Look through the GitHub issues for features. Anything tagged with “feature” is open to whoever wants to implement it.

Write Documentation

Django DAL could always use more documentation, whether as part of the official Django DAL docs, in docstrings, or even on the web in blog posts, articles, and such.

Submit Feedback

The best way to send feedback is to file an issue at <https://github.com/MPASolutions/django-dal/issues>.

If you are proposing a feature:

- Explain in detail how it would work.
- Keep the scope as narrow as possible, to make it easier to implement.
- Remember that this is a volunteer-driven project, and that contributions are welcome :)

1.3.2 Get Started!

Ready to contribute? Here’s how to set up *django-dal* for local development.

1. Fork the *django-dal* repo on GitHub.
2. Clone your fork locally:

```
$ git clone git@github.com:your_name_here/django-dal.git
```

3. Install your local copy into a virtualenv. Assuming you have virtualenvwrapper installed, this is how you set up your fork for local development:

```
$ mkvirtualenv django-dal
$ cd django-dal/
$ python setup.py develop
```

4. Create a branch for local development:

```
$ git checkout -b name-of-your-bugfix-or-feature
```

Now you can make your changes locally.

5. When you’re done making changes, check that your changes pass flake8 and the tests, including testing other Python versions with tox:

```
$ flake8 django_dal tests
$ python setup.py test
$ tox
```

To get flake8 and tox, just pip install them into your virtualenv.

6. Commit your changes and push your branch to GitHub:

```
$ git add .
$ git commit -m "Your detailed description of your changes."
$ git push origin name-of-your-bugfix-or-feature
```

7. Submit a pull request through the GitHub website.

1.3.3 Pull Request Guidelines

Before you submit a pull request, check that it meets these guidelines:

1. The pull request should include tests.
2. If the pull request adds functionality, the docs should be updated. Put your new functionality into a function with a docstring, and add the feature to the list in README.rst.
3. The pull request should work for Python 2.7, and 3.4, 3.5, 3.6, 3.7 and for PyPy. Check https://travis-ci.org/MPASolutions/django-dal/pull_requests and make sure that the tests pass for all supported Python versions.

1.3.4 Tips

To run a subset of tests:

```
$ python -m unittest tests.test_django_dal
```

1.4 Credits

This package was developed by MPA Solutions

1.4.1 Development Lead

- Alessandro Regolini <regolini@mpasol.it>
- Alessio Bazzanella <bazzanella@mpasol.it>
- Radim Blazek <radim.blazek@gmail.com>

1.4.2 Contributors

None yet. Why not be the first?

1.5 Change Log

All notable changes to this project will be documented in this file.

The format is based on [KeepAChangelog](#) and this project adheres to [Semantic Versioning](#).

1.5.1 [Unreleased]

1.5.2 [1.0.0] 2021-03-02

Added

- First release on PyPI.

CHAPTER 2

Indices and tables

- `genindex`
- `modindex`
- `search`
